

OVERVIEW

DHI (India) Water & Environment Pvt. Ltd in association with SCMS Water Institute Cochin is organizing a One-Day Training on MIKE+ Water Distribution on 20th January 2021 at SCMS Campus.

Water utilities must continuously adapt to changing economic, societal, governmental, and environmental challenges. At the same time these challenges can also be opportunities for implementing holistic approaches to the management of water utilities.

To meet these challenges, access to the right tools is essential. MIKE+ enables you to solve these challenges successfully, make sound decisions and create future concepts for water distribution systems concepts that are cost-effective as well as resilient to change. MIKE+ provides essential tools for making your water projects successful.
