The NSS SSET Units No. 182 and 328 initiated the "Campus KRISHI" agricultural farming program at SCMS School of Engineering and Technology. This innovative initiative aims to promote sustainable agricultural practices and instil a sense of self-sufficiency among the campus community. Through the cultivation of a variety of vegetables such as ladies' fingers, bitter gourd, beans, and tomatoes, participants have actively engaged in hands-on farming experiences. The program not only emphasizes the importance of locally sourced produce but also fosters a deeper understanding of organic farming methods, contributing to environmental preservation.

Since its launch, the Campus KRISHI program has garnered enthusiastic participation from students and faculty members alike. Regular expert-led practical demonstrations

on agriculture farming have further enriched the learning process, equipping participants with essential skills and knowledge in modern agricultural techniques. This initiative serves as a commendable step towards promoting sustainable living and fostering a greater appreciation for agriculture within the academic community at SCMS School of Engineering and Technology
