CIRCULAR

Considering the acute shortage of power, KSEB has informed us that our monthly quota for current consumption is restricted to 75% of actual power allocation (17,732 Units only)

Students and staff are requested to take extreme precautions to avoid wastage of energy by switching off lights and equipments when not in use, switching off the power supply to the hostels during the day time, switching off fans etc. when there is no one in the room and other steps as required to limit the power consumption within the reduced quota.

All are requested to cooperate.
