

# SCMS SCHOOL OF ENGINEERING AND TECHNOLOGY

AAWAAZZ  
EDITION 10

## MISSION

M1: Creating excellence in Computer Science & Engineering through academic professionalism for the changing needs of society.

M2: Establishing a center of excellence for research and for technical development in the area of Computer Science & Engineering.

M3: Developing communication skills, teamwork, and leadership qualities for continuing education among the students, through project-based and team-based learning.

M4: Inculcating ethics and human values for sustainable societal growth and environmental protection.

M5: Empowering students for employability, aspiring higher studies, and becoming entrepreneurs.

## PROGRAM EDUCATIONAL OBJECTIVES

PEO 1. Apply computer science theory blended with mathematics and engineering to model computing systems.

PEO 2. Nurture a strong understanding of logical, computing, and analytical reasoning among students coupled with a problem-solving attitude that prepares them to productively engage in research and higher learning.

PEO 3. Communicate effectively with team members, engage in applying technologies, and lead teams in the industry.

PEO 4. Engage in lifelong learning, and career enhancement and adapt to changing professional and societal needs.

## VISION:

*To achieve academic excellence in creating globally competent professionals and an ethically strong global workforce in the field of Computer Science & Engineering, facilitating research activities, and catering to the ever-changing industrial demands and societal needs.*

**Magazine Editor**  
**IRIN PAPPACHAN**  
(S7 EE)

**Sports Secretary**  
**ELVIS THOMAS**  
(S7 CS)

Ms.KS Kannaki Natsenet, a Student of S8CSE got placed in Travancore Analytics

The project proposal titled “ A Swarm based AI aided Wheel Bot System to detect cracks in Railway tracks” has been approved for the financial assistance of Rs48260/- under the CERD Scheme of APJ Abdul Kalam University 2022. The student investigators are:

- 1) Mr. Neeraj M, S7 Semester, Computer Science and Engineering
- 2) Mr. Neeraj Sagar, S7 Semester, Computer Science and Engineering
- 3) Mr. Vaibhav Nair, S7 Semester, Computer Science and Engineering
- 4) Mr. Yadukrishnan P S, S7 Semester, Computer Science and Engineering

The Principal Investigator is Ms. Rosebell Paul, Assistant Professor, CSE, SCMS School of Engineering and Technology and the Co-Investigator is Prof. Dr. Varun G Menon, HOD, CSE, SCMS School of Engineering and Technology.

The primary objective of this project is to design and implement a railway track crack detection system through an interconnection of highly precise and mobile robots. The bot network achieves such an obstacle detection system through an intricate usage of ultrasonic sensors and high-resolution camera technology. The gravity of such a system becomes more significant as Indian Railway currently lacks efficient technologies to ensure safety. Contemporary accident prevention methods are highly prone to human error and can lead to a mishap of unprecedented proportions.

Announced the winners of the Android App Development Contest - The Department of Computer Science and Engineering has organized an online workshop on “Android App Development “ for school students from 8th grade to 12th grade on April 12th, 2022, and April,13th 2022. The faculties of the Computer Science Department conducted an online workshop on “Android Basics for Beginners “. The objective of the workshop was to create an interest in participants on Android applications, their design, and their applicability in the real world. The program gave an insight into the development of mobile applications in detail with real-time examples. The concepts and steps were well-defined and explained in the session. Their participants for the workshop included 60 students from 15 different schools. The sessions were highly interactive with hands-on demos, discussions, and quizzes. The Android App Development Contest and the final evaluation were done on 19th April 2022 by experts from college and industry as well.

## FDP

Department of Computer Science and Engineering has organized an online Faculty Development Program on “RESEARCH TRENDS AND APPLICATIONS OF IOT ” from 23/05/2022. The sessions were handled by experts from both Academics and Industry. The FDP focussed on the emerging and recent areas of research, adopted for many applications.

FDP focused on a theoretical approach to describe the fundamentals for beginners as well as a practical approach with the implementation of case studies for intermediate and advanced readers. The Internet of Things (IoT) is an interconnection of several devices, networks, technologies, and human resources to achieve a common goal. A variety of IoT-based applications are being used in different sectors and have succeeded in providing huge benefits to users. As a revolution, IoT overtook the entire global landscape with its presence in almost every sector, including smart cities, smart grids, intelligent transportation, healthcare, education, and so on. This technological revolution also moved to the machines, converting them into intelligent computers that can make real-time decisions and communicate with each other, forming an Internet of Systems/Machines. The use of secure lightweight protocols will help us in developing environment-friendly and energy-efficient IoT systems.
