

Mr. Saeed Rahman, Alumnus of SSET and a former Explora committee member delivered a speech on how to pursue higher education abroad. The session started with Mr. Saeed describing about block chain technology. A block is the 'current' part of a block chain, which records some or all of the recent transactions. Once completed, a block goes into the block chain as a permanent database. Each time a block gets completed, a new one is generated. There is a countless number of such blocks in the block chain, connected to each other. In his talk he also mentioned that Information held on a block chain exists as a shared and continually reconciled database.

He concluded his session by discussing about how to pursue higher education in US and Canada and the various exams that need to be undertaken.

This event was conducted on 18/01/2018 by the Explora team for all the students of ECE department.
