

CRITERIA 2

TEACHING, LEARNING AND EVALUATION

2.3.1 Student centric methods, such as experiential learning, participative learning and problem solving methodologies are used for enhancing learning experiences using ICT tools

Experiential learning/Participative learning/ Problem solving

- **List of Experiential learning/Participative learning/ Problem solving**
- **Sample filed documents of experiential learning ,case study, live project in class rooms**
- **Outbound Training**
- **Mandatory Summer Internship in reputed firms**
- **Real world project**
- **Hands on laboratory experiments**
- **Roleplays**
- **Inter college Fests**
- **Skill based courses**
- **Etiquette Training**
- **Simulation exercise**

110	I	Presentation of previous day's topics	Foundations and methods of psychology	Participative Learning
111	I	Observe and analyse people around	Foundations and methods of psychology	Experiential Learning
112	III	Find and present examples from around	Living in the social world	Experiential Learning
113	I	Hall of Fame. Find eminent personalities and present their work and contributions to psychology	Foundations and methods of psychology	Participative Learning
114		Quiz series	Both batches	Experiential Learning
115	IV	Experiments	Experimental psychology	Experiential Learning
116	III	Old age home visit	Field trip	Experiential Learning
117	I	Shelter home visit	Field trip	Experiential Learning
118	II	Various sexual orientations	Case study	Case Study
119	I	Psychological digestive disorders	Case study	Case Study

Report on Experiential Learning / Participative Learning/ Problem Solving

Program	:MBA	Batch & Year	:MBA 18, 2020-2022
Semester	: First 4	Faculty	: Dr. Roshni P. R
Course title	: Behavioural Finance	Type of Activity	: Live Project
Date of activity	: April-July 2022		

OBJECTIVES OF THE ACTIVITY

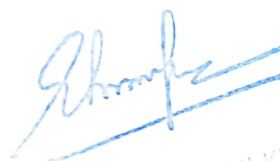

- Application of theory to practice

Objectives:

By interacting with investors students will get to know how portfolio are maintained by individual investors and how they are influenced by behavioural biases

METHOD (Description)

Outcomes: The student gets hands on experience in identifying the portfolios of investors, risk appetite of investors and their behavioural biases

Introduction

A financial market is a market in which people trade in securities and derivatives at low operating costs. Some of the securities include stocks and bonds, commodities and precious metals, known in the financial markets as assets. The financial market in any country is central to the economic system. Financial market trends will help allocation of shares in economic sectors. Allocation of funds helps to maintain an important area of investment and savings. The financial system in India is huge, flexible and then a real system as it tends to respond to the changing needs of the economy. There are a number of ways to invest in the Indian financial system. There are other investment options that tend to offer higher returns and there are those that do not like to offer higher returns. In addition, the risks associated with investment strategies are always variable. Some methods are very dangerous and some are not very dangerous. These are two major factors that affect investors' perceptions of equity investment. Investment is called total investment, where investment is able to meet the needs of investors. This is one of the main reasons why the start-up of a complete investment focuses on the needs of investors.

Equity and derivatives are two ways to invest in the Indian people when it comes to investing decisions. Equity means the difference between the value of assets and liabilities. If the debt is more than those goods and equity can also be negative. Shareholder equity refers to the equity of a company divided into preferred stock shareholders. The amount of capital stock also depends on the economic prospects of the organization. The derivative on the other hand refers to security at that price depending on the basic assets. It is also assumed that the derivative is derived from the value of other sources or assets. The underlying asset derivatives are assets, bonds, funds, stocks, market indicators and interest rates. The study focuses on finding out investors including stock market investors to find out what extend their belief, preference, interests, risk perception etc.

Program :MBA Batch & Year : MBA 17
Semester :IV Faculty : Dr. Deepa Pillai
Course title : Leadership for Managerial Type of Activity : Experiential Learning
performance
Date of activity : 15/03/2021

OBJECTIVES OF THE ACTIVITY

- To profile a business leader – basic research on early life, education, career, mid career, family and retirement
- Challenges faced and overcome
- To understand his leadership styles

METHOD (Description)

They need to use secondary data for this.

Students need to

Select the leader they want to profile.

They need to begin the research on their early life, education, career , mid –career , family retirement, challenges faced and overcome and leadership styles

OUTCOMES:

The student get an understanding the leadership styles of the leaders and can also profile them .

INTRODUCTION

Elon Musk is working to revolutionize transportation both on Earth, through electric carmaker Tesla - and in space, via rocket producer SpaceX. He owns 21% of Tesla but has pledged more than half his stake as collateral for loans; Forbes has discounted his stake to consider the loans. He stepped down as chairperson in 2018, after making alleged "false statements" about a plan to take Tesla private, triggering an SEC probe. SpaceX, Musk's rocket company, is now valued at \$46 billion. He grew up in South Africa, and then immigrated to Canada at age 17. He landed in the U.S. as a transfer student to the University of Pennsylvania. Musk was born to a Canadian mother and South African father and raised in Pretoria, South Africa. He briefly attended the University of Pretoria before moving to Canada aged 17 to attend Queen's University. He transferred to the University of Pennsylvania two years later, where he received dual bachelor's degrees in economics and physics. He moved to California in 1995 to attend Stanford University but decided instead to pursue a business career, co-founding the web software company Zip2 with his brother Kimbal. The start up was acquired by Compaq for \$307 million in 1999. Musk co-founded online bank X.com that same year, which merged with Confinity in 2000 to form the company PayPal and was subsequently bought by eBay in 2002 for \$1.5 billion. Musk has been the subject of criticism due to unorthodox or unscientific stances and highly publicized controversies. In 2018, he was sued for defamation by a diver who advised in the Tham Luang cave rescue; a California jury ruled in favor of Musk. Also, in 2018, the US Securities and Exchange Commission (SEC) sued him for falsely tweeting that he had secured funding for a private takeover of Tesla. He settled with the SEC, temporarily stepping down from his chairmanship and accepting limitations on his Twitter usage.

Early Life

Musk was born on June 28, 1971, in Pretoria, South Africa. As a child, Musk was so lost in his daydreams about inventions that his parents and doctors ordered a test to check his hearing. At about the time of his parents' divorce, when he was 10, Musk developed an interest in computers. He taught himself how to program, and when he was 12 he sold his first software: a game he created called Blaster. In grade school, Musk was short, introverted and bookish. He was bullied until he was 15 and went through a growth spurt and learned how to defend himself with karate and wrestling. His father was an engineer and his mother was a model and nutritionist. He is the oldest of three children in an ambitious family. His brother Kimbal Musk is currently a venture capitalist and environmentalist. His sister Tosca Musk is an award-winning producer and director. After his parents divorced when he was a child, Musk lived primarily with his father. Musk started school a year early, attending the private Waterkloof House Preparatory School and later graduating from Pretoria Boys High School. He read voraciously and was also an avid fan of comics. Self-described as a bookworm and something of a smart aleck, he was bullied in school and withdrew to his books at the expense of his social life. At 17, Musk moved to Canada to avoid serving in the South African military, whose main duty in the late 1980s was enforcing apartheid. He would later obtain Canadian citizenship through his mother.

After emigrating to Canada, Musk enrolled in Queen's University in Kingston, Ontario. It was there that he met Justine Wilson, an aspiring writer. They would marry and have five sons together, twins and triplets, before divorcing in 2008.

Career

Musk attended Queen's University in Kingston, Ontario, and in 1992 he transferred to the University of Pennsylvania, Philadelphia, where he received bachelor's degrees in physics and economics in 1997. He enrolled in graduate school in physics at Stanford University in California, but he left after only two days because he felt that the Internet had much more potential to change society than work in physics. In 1995 he founded Zip2, a company that provided maps and business directories to online newspapers. In 1999 Zip2 was bought by the computer manufacturer Compaq for \$307 million, and Musk then founded an online financial services company, X.com, which later became PayPal, which specialized in transferring money online. The online auction eBay bought PayPal in 2002 for \$1.5 billion. Musk was long convinced that for life to survive, humanity has to become a multiplanet species. However, he was dissatisfied with the great expense of rocket launchers. In 2002 he founded Space Exploration Technologies (SpaceX) to make more affordable rockets. Its first two rockets were the Falcon 1 (first launched in 2006) and the larger Falcon 9 (first launched in 2010), which were designed to cost much less than competing rockets. A third rocket, the Falcon Heavy (first launched in 2018), was designed to carry 117,000 pounds (53,000 kg) to orbit, nearly twice as much as its largest competitor, the Boeing Company's Delta IV Heavy, for one-third the cost. SpaceX has announced the successor to the Falcon 9 and the Falcon Heavy: the Super Heavy-Starship system. The Super Heavy first stage would be capable of lifting 100,000 kg (220,000 pounds) to low Earth orbit. The payload would be the Starship, a spacecraft designed for providing fast transportation between cities on Earth and building bases on the Moon and Mars. SpaceX also developed the Dragon

a younger sister, Tosca (born 1974). His maternal grandfather, Joshua Haldeman, was an American-born Canadian. His paternal grandmother had British and Pennsylvania Dutch ancestry. After his parents divorced in 1980, Musk lived mostly with his father in the suburbs of Pretoria. At the age of 10, he developed an interest in computing while using the Commodore VIC-20

Elon Musk met Justine Wilson while they were attending Queen's University in Kingston, they got married in 2000. The couple eventually moved to Los Angeles and had a son named Nevada, whom they lost to SIDS when he was 10 weeks old. They ultimately had twins and triplets — five sons in total — named Griffin, Xavier, Damian, Saxon, and Kai. The couple divorced in 2008. After Musk's divorce from Justine, Elon Musk got married to Talulah Riley in 2010. Two years later, news of their divorce became public when Musk tweeted: "It was an amazing four years. I will love you forever. You will make someone very happy one day" at Riley on Twitter. The couple remarried in 2013. Musk filed for — then withdrew — a second divorce the following year. In 2016, Riley filed for divorce from Musk, which was finalized later that year.

In May 2018, Musk arrived at the annual Costume Institute Gala at the Metropolitan Museum of Art alongside Grimes, the Canadian singer and producer. The couple met over Twitter when Musk was planning to make a joke about artificial intelligence later. Later it was confirmed that she and Musk were having a baby, which was born on May 4. The couple says they named their son X Æ A-12, which is partially a reference to a CIA plane nicknamed "Archangel."

Challenges faced and overcome

1. Rejection from Netscape and Ousted at ZIP2

When Elon first started out, he unsuccessfully applied to a number of emerging tech companies including Netscape. In light of these rejections, he founded a searchable business directory called Zip2 which was essentially an online version of a telephone book. It may seem like a very simple idea now but this was revolutionary at a time when the use of computers was still very small. Unfortunately, Zip2 struggled in the early years and most investors had no interest in funding the idea. Later, Musk wrote the code for a mapping project which essentially enabled him to combine the two ideas. The company staff lived on premises to cut down on costs. Anyway, Zip2 eventually received some much-needed investment in 1996 but incredibly, Elon Musk was ousted as the CEO of the company and given a much smaller role. However, he did manage to help remove a later CEO, Richard Sorkin, when he did not agree with his vision or principles for the company. After considerable success, the entrepreneur decided to move on and work on a brand-new concept that would be the beginning of what we now know as PayPal.

Paypal Was Initially Voted 'the Worst Business Concept of the Year'. Believe it or not, PayPal was voted the worst business idea of the year in 1999 when it was released as a security software for the PalmPilot and other handheld devices. However, Musk and co-founder Max Levchin started to focus on creating an online wallet which started to gain traction.

In fact, when users began emailing the company, it was clear that this wallet was being used to facilitate eBay auctions, so they decided to scrap the original idea and proceeded with an electronic wallet. Eventually,

ASSIGNMENT 2

TITLE

UNDERSTANDING LEADERSHIP STYLES OF A LEADER

Report on Participative Learning

Subject: ACCOUNTING FOR MANAGEMENT

Year: 2017 - 2018

CASE STUDY ANALYSIS

Objectives:

1. Students get an exposure to real business world and its challenges.
2. To develop skills to obtain the information they need after analyzing the case, and then employ their own analysis, judgment and to make the right decisions.

Method

Students need to identify the case studies related with Kingfisher scandal and Satyam scam, in which they need to understand the scenarios of how these companies indulge in fraudulent activities and prepared fake statement of accounts. After analyzing these two cases students need to discuss and prepare a report individually. They also need to understand there can be chances of such activities in the industry, so as a manager they need to be more vigilant and cautious.

Outcomes

1. It gives them an outlook of the business world in which how accounts can be used as a tool to misrepresent information.
2. As management students they are able to identify such scenarios and need to avoid such fraudulent activities.
3. It helps the student to identify the context and environment for learning and developing the skills related with management accounting.

Satyam Scandal

On January 7 2009, Mr Raju disclosed in a letter to Satyam Computers Limited Board of directors that he had been manipulating company's accounting numbers for years. He stated that he overstated assets on Satyam's Balance sheet by \$1.47 billion. Satyam also underreported liabilities on its balance sheet. Satyam overstated ~~near~~ its income nearly every quarter over the course of several years to meet the expectations of analysts. Using his Personal computer Rameshlinga Raju created falsified bank accounts and fake salary accounts. According to CBI, the Indian crime investigation agency the fraud activity dates back from April 1999, when the company started to have a double digit growth.

Global auditing firm, Pricewaterhouse Coopers (PWC) audited Satyam's books from June 2000 until the discovery of fraud in 2009. ~~At~~ The way in which cash was invested itself would raise suspicion. Also fictitious sources were used several times which these people could

not found.

Fabricated balance sheet & income
of Satyam = as of Sept 30, 2008

Statement

Items Rs. in Crore	Actual	Reported	
Cash and Bank Balances	321	5361	50
Accrued Interest on Bank fixed Deposits	Nil	376.5	32

OBT- Outbound training program

The Outbound Training is a 3-day programme for SSTM MBA students who can capture management lessons from outside the campus. This program's objectives are to enhance skills such as team coordination, leadership, strategic decision-making, time management, competitive approach, and presence of mind. Students were divided into groups during this program to take up different adventurous and management activities. All tasks included in these three days programs are to learn management lessons practically by experimental learning.

A Report on the discussion held with the students on 05/03/21, Friday.

The session held on 05/03/21 (Friday) was handled by Ms. Priya Jagadeesh, Assistant Professor - Law, SCMS Cochin School of Business. The session was on 'Cyber-crimes and law'. The speaker started off the session by asking students whether they have had any bitter experience in the online world.

She pointed out various examples as well as her personal experiences to the students regarding the various cyber-criminal activity happening in India. She touched upon some of the important factors like complacency and ignorance, which in a way acts as a basic reason for most of the cyber-crimes. She also mentioned about spoofing and cyber bullying. The speaker also touched upon areas like fake URL's, fake profiles, and the like in which the common people fall prey. She pointed out that the millennials and the older generation were the prime targets for cybercrimes. It was a very relevant topic, and the students were also able to share their point of view on the same. A total of twenty-four students participated in the session.

Co-ordinator: Arun Krishnan

A Report on the discussion held with the students on 12/11/21, Friday.

The session was conducted on 12/11/2021 (Friday). The speaker for the day was Dr. Suja Nair, Assistant Professor, Department of Psychology, SSTM. The session started at 11.10 am, and there were 23 students for the same. The speaker conducted a debate on the topic "Health as an industry" and it was a very insightful one.

During the post covid days, all departments of our society were shut down except a few and one of the overworked systems was medical. So the medical system of our country needed a particular attention and hence, this topic was very relevant. To start with the debate the participants were divided into two groups as for and against. The students turned out to be very active throughout the session. They spoke their opinions in various perspectives. The speaker was quite happy with the way the students participated. The session came to an end by 11.50 am with a cup of tea.

A Report on the discussion held with the students on 8/12/21, Wednesday.

The session was conducted on 8/12/2021 (Wednesday). The speaker for the day was Dr. Mary Fatima Cross, Associate Professor of English, Department of MBA, SSTM. The session started at 1.50 pm, and there were 27 students for the same. The speaker conducted a discussion on the topic "Hard work versus smart work" and it was a very insightful one.

The speaker conducted the session in a very interactive manner. The session was started with the story about the smart works of former district collector Mr. Rajamanikyam IAS. She insisted the students to choose smart work over hard work. The speaker was quite happy with the way the students participated. The session came to an end by 2.50 pm with a cup of tea.

REPORT

Participative learning:

Participative learning is employed to the students of Bcom second semester for their subject English-Issues That Matter. Various activities are included for the students to learn the language, English and improve their communication skills. The various activities I have included in their curriculum are mainly Recitation, Role play and Peer learning. Activities that improve their communication skills and camaraderie amongst them. The photograph of the activity for improving their communication skills and role play is incorporated here.

Etiquette Training

SCMS SCHOOL OF TECHNOLOGY AND MANAGEMENT

SCMS Campus, Prathap Nagar, Muttom, Aluva, COCHIN- 683 106. KERALA

The business meal is a popular activity in the workplace; thus it is fitting that for business students to understand business meal etiquette as they embark on their careers. This interactive session was designed to be easily understood by beginners on key points to be kept in mind on dining etiquette.

The students of MBA Batch 14 attended a training session on Dining Etiquette conducted at Hotel Courtyard by Marriott Kochi Airport, Nedumbassery, on 19 January 2018 from 10:30 am till 3:00 pm. The faculty members who accompanied the students were Ms. Sreelakshmi K.R. and Ms. Devi S. Nair.

The session started off with the speaker asking the students what they would be expecting to learn from the day's session and few points were jotted down on the board. The theory and practical sessions went on simultaneously so that students could learn by doing. After the initial introduction to the session and topics, students started with the soup course followed by salad, entrée and desserts.

At the conclusion of the meal, the speakers covered various topics which included:

.Do's and Don'ts of table manners

Common courtesy and greetings

Value of practicing good table manners

Described the host's responsibilities and a guest's obligations

Types of beverages and glasses used for each kind of beverage

Use of dining utensils correctly

Proper table settings for various occasions

How to carry on an appropriate dinner conversation

Simulation exercise

Algorithm

Bucket Sort(A[])

1. Let $B[0 \dots n-1]$ be a new array
 2. $n = \text{length}[A]$
 3. for $i=0$ to $n-1$
 4. make $B[i]$ an empty list
 5. for $i=1$ to n
 6. do insert $A[i]$ into list $B[n \cdot a[i]]$
 7. for $i=0$ to $n-1$
 8. do sort list $B[i]$ with insertion-sort
 9. Concatenate lists $B[0], B[1], \dots, B[n-1]$ together in order
- End

Scatter-gather approach

The Bucket sort algorithm can be understood via scatter-gather approach. Here, the given elements are first scattered into buckets. After scattering, elements in each bucket are sorted using a stable sorting algorithm. At last, the sorted elements will be gathered in order.

Let's take an unsorted array to understand the process of bucket sort. It will be easier to understand the bucket sort via an example.

Let the elements of array are -

10	8	20	7	16	18	12	1	23	11
----	---	----	---	----	----	----	---	----	----

Now, create buckets with a range from 0 to 25. The buckets range are 0-5, 5-10, 10-15, 15-20, 20-25. Elements are inserted in the buckets according to the bucket range. Suppose the value of an item is 16, so it will be inserted in the bucket with the range 15-20. Similarly, every item of the array will insert accordingly.

This phase is known to be the **scattering of array elements**.

0-5

5-10

10-15

15-20

20-25

Now, **sort** each bucket individually. The elements of each bucket can be sorted by using any of the stable sorting algorithms.

0-5

5-10

10-15

15-20

20-25

At last, **gather** the sorted elements from each bucket in order

Now, the array is completely sorted.

Bucket sort complexity

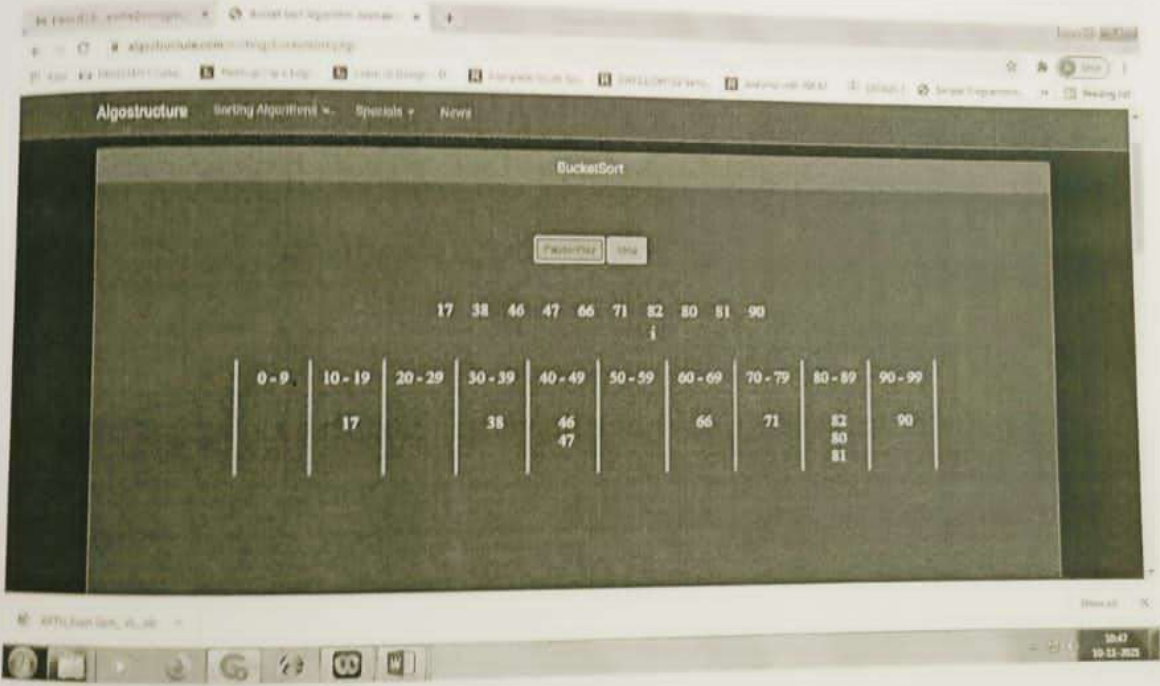

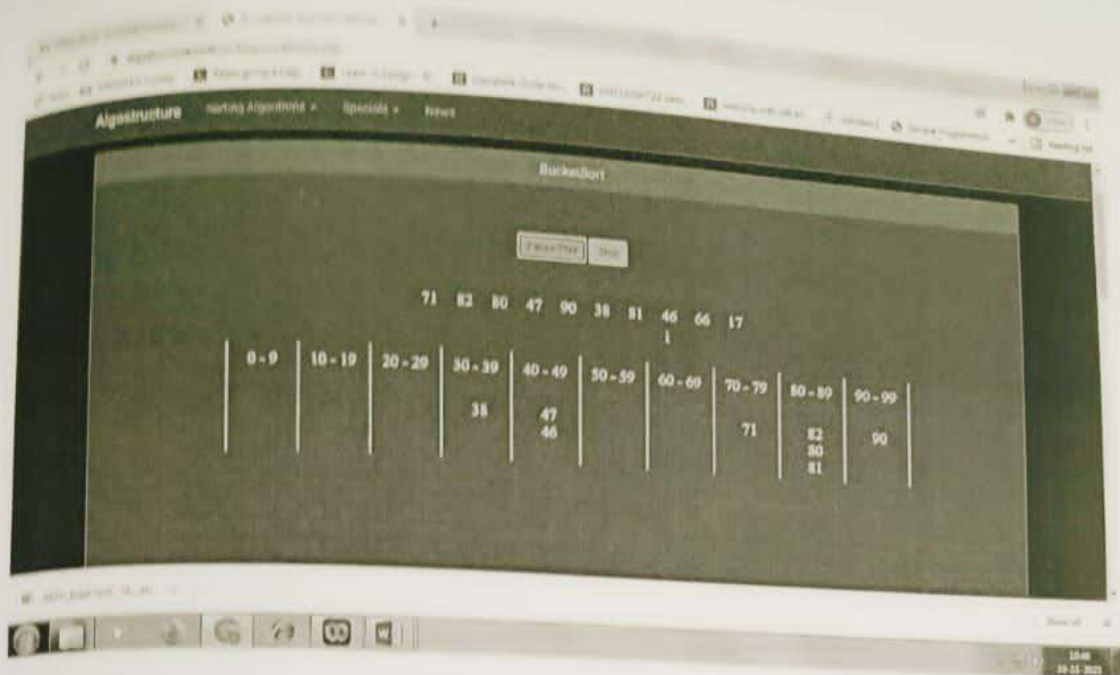

The time complexity of bucket sort in best case, average case, and in worst case is given in the table below.

1. Time Complexity

Case	Time Complexity
Best Case	$O(n + k)$
Average Case	$O(n + k)$
Worst Case	$O(n^2)$

- **Best Case Complexity** - It occurs when there is no sorting required, i.e. the array is already sorted. In Bucket sort, best case occurs when the elements are uniformly distributed in the buckets. The complexity will be better if the elements are already
