### **Research Programme**

Some significant observations at molecular level regarding the antihyperglycemic properties of fruit extract of jack fruit and wound closure effect of *Hemigraphis alternata* were noticed from research activities. The marker gene for the antihyperglycemic property GLUT4 was showed a remarkable increase in the treated cells with jack fruit extract by real time PCR. Similarly, PDGF (Platelet derived growth factor) gene involved in cell proliferation and wound healing showed remarkable level of increase in 3T3L1 cells treated with HALE. All the other research programmes on GAPDH, TGF genes are progressing as per the plan.

### **Academic**

As the external research interaction, BMT wing, SCTIMST has invited as the examiner of the Ph.D comprehensive exam on January 10<sup>th</sup> 2018 at Thiruvananthapuram. ### **Research Programme**

The first phase of the research work for detecting the antidiabetic property of jack fruit varieties was completed with very promising data. The effect of the jack fruit perianth on absorbing glucose from the cell system was determined in cell lines by quantifying the marker gene GLUT4. The gene expression showed an elevated level in cell lines treated with fruit extract of jack. Further studies are being undertaken for establishing the antidiabetic activity of jack fruit.

Since the molecular investigation on the wound healing effect of *Hemigraphis alternata* has reached at the last phase the two major experiments of the detection of active component in the leaf extract by preparatory HPLC and its wound healing effect on animal models have to be completed by outsourcing it in other NABL accredited centers. We have already submitted the samples for the work.

## SIBB-R&D

### **Research Programme**

As per the research plan, the antidiabetic studies on Jack fruit perianth and sequential fractionation of wound healing extracts are being undertaken subsequent to the first phase of results. We are facing some technical delay in doing GC/MS for detecting the active compound, since the contacted research institute is busy with some scheduled work for the time being. It can be completed without delay. Three of our faculty members Dr.Swapna David, Dr.Neetha John and Dr.Sreelekshmi have submitted independent project under the mentorship of the Director to BIOCARE, scheme of DBT and WOS of DST. The Neera steering committee nominated by the Govt. of Tamil Nadhu has visited our Neera demonstration plant in order to understand the viability of SCMS Neera Technology. The intention of the committee is to implement SCMS Neera technology at Tamil Nadu. We convinced the practical viability of our technology at industrial scale compared to the other i.e., CPCRI technology.

### **Research Programme**

Though we pursue the research activities of animal cell culture, due to the intermittent failure of -80°C freezer, this month not much focus was given for molecular research. We represented the matter to the management and the steps are being undertaken for getting a new -80°C freezer. The institute has submitted a proposal to DST under FIST is for the development of infrastructure with all necessary documents on June 13<sup>th</sup> 2018 and we received the registration number from DST. With respect to the earlier proposal submitted to DBT for the conduction of Two Week Short Term Training programme in Molecular Biology for faculty members and research scholars at National level, the screening committee of DBT has suggested some modifications in the proposal. Based on the suggestions of DBT, we modified the proposal and submitted for financial approval.

## SIBB-R&D

### **Official Activities**

- a) With reference to the decisions taken at the Management meeting of Head of Institutions held on July 13<sup>th</sup> regarding the structural components of the monthly report, an in-house meeting of all the faculty members was conducted at SIBB-R&D for highlighting the requirements of the monthly report. All the faculty members convinced about the need of the monthly report.
- b) Based on the presentation made by Dr. Sunny George on water conservation, Dr. Sunny Jacob on the Biological interference of Robotics tools and Dr. Varun Menon on research collaboration with foreign Universities and Institutes, we have expressed our academic and research interest to involve in the three sectors with respect to our expertise and man power. We talked to all the three heads about our interest and they interacted very positively for collaboration. As the part of the interaction, Dr. Varun Menon has come to SIBB-R&D for seeking the possibilities of international link with foreign Universities matching with the academic and research activities of SIBB-R&D. We have provided a brief summary of our research and academic activities to him for his reference. Further meetings and discussion are being essential for developing a positive platform for biotech research collaboration with foreign Universities. Now we identified some of the biotech institutions in Japan and Australia for further discussion.
- c) In connection with the promotion of Neera Industry in Tamil Nadu, we have attended the Neera Steering Committee meeting as the nominated member of Government of Tamil Nadu. The objective of the meeting was to select the appropriate technology for the promotion of Neera Industry in Tamil Nadu. As per the instructions of Agricultural marketing Commissioner, the nominated members of Neera Steering Committee had visited SCMS on May 17<sup>th</sup> 2018 for understanding the industrial viability of SCMS Neera technology. The members were so impressed with our processing and harvesting

system of Neera. For the consideration of the committee, there are three technologies from CPCRI, CDB and SCMS. During our presentation, we pointed out the scientific merits of SCMS Technology and highlighted the uniqueness of SCMS Technology as farmer friendly, cost effective and the health benefits of Neera. Now the file is under the scrutiny of Tamil Nadu Government.

## Research Activities

Apart from the ongoing research project on the molecular mechanism of wound healing, we initiated three new research programmes on antidiabetic property of Jack Fruit, therapeutic properties of Virgin coconut oil by molecular means with reference to dementia, anticancer effect of Bromelain using animal cell line models. We have submitted a research paper for publication in an International Journal this month related to the Ph.D. programme of Divya Sreekumar under the research supervision of Dr. Salini Bhasker. As per the course plan of M.Sc IV Semester, the students were allotted to each faculty. Their research work will be started after the completion of the III Semester University Practical Exam.

## Academic activities

For the new batch of B.Sc Botany & Biotechnology (2018-2021), we will include the certification courses for each semester for developing self-employability among students. So Apiculture is being selected as the course for the first semester. The first phase discussion was held with Mr.Joycee, the faculty of Golden Bee Farm at Principal's cabin on July 27<sup>th</sup> 2018 regarding the course plan, practicals and field trips. Subjected to the confirmation of Dr.Radha Madam, the course can be started at the last week of August 2018.

Due to the unforeseen incidence of the flood that occurred at Cochin, especially in Kalamassery and the subsequent calamities followed by the flood, our Biotechnology institute was given as a relief camp for more than 200 people with effect from 17-08-2018 to 24-08-2018.

## Research Activities

As the part of Coconut Neera research, a protocol has been standardized for detecting the alcohol content of Neera qualitatively. This method has lot of significance in the commercial viability of SCMS Neera technology. We applied this technique in raw Neera purchased from Vytilla Hub. The data shows that the Neera collected by chilling technology contain less than 6% alcohol equivalent to sweet toddy. This is due to low temperature fermentation happened during harvesting by chiller device at 4°C. In the case of Neera collected by AFX method, the protocol of detecting ethanol in commercial Neera can be an effective method for determining the manipulation of Neera industry.

## Academics

All the internal examinations that we scheduled for III<sup>rd</sup> and V<sup>th</sup> semester B.Sc students were completed without any problem.

The first semester M.Sc Molecular Biology & genetic Engineering classes was started with effect from August 29<sup>th</sup> 2018. The research topics for the IV<sup>th</sup> semester M.Sc students were allotted for their dissertation.

### **Official activities**

An official meeting was held at Board room SCMS on September 10<sup>th</sup> 2018 with all Heads and Directors of the institution. The meeting was presided by Pramod Sir, Vice-Chairman, SCMS Group. Dr.Amiya Bhaumik, the Vice-chancellor, Lincoln University, Malaysia was present as the Chief Guest of the meeting. At the meeting subsequent to the introduction of Pramod Sir, Dr.Amiya Bhaumik has delivered a speech on the academic and research activities of Lincoln University and the interaction of the University at International level. The Directors explained the potentials of their institutes and possibilities of further interaction with LUC at research and industrial scale. Based on the research and academic activities of SIBBRD, Dr.Bhaumik has expressed his initial enthusiasm and interest on the research activities of SIBB with special reference to the coconut biofuel.

With respect to the academic and research interest of LUC towards SIBBR&D, we have sent an email to the VC-LUC emphasizing three levels of interaction ie. Bioindustry, research and academics. The reply mail of VC was so optimistic and the industrial interest of coconut biofuel in Malaysia was highlighted. So further meaningful and healthy discussion with LUC is essential for materializing the concept of industry, research and academic interaction.

## SIBB-R&D

### **Research Activities**

Subsequent to the ongoing research activities, the cell lines needed for the molecular studies on Virgin coconut oil (VCO) were intended to NCCS, Pune. Since the focus of the work on virgin coconut oil (VCO) has two objectives i.e., the role of VCO in ketone body synthesis and the therapeutic effect of VCO in angiogenesis, antidiabetic, the primers for the marker genes involved in both were designed for synthesis. Based on the nature of our objectives, we plan to prepare of VCO that prepare exclusively at the lab. Hence a protocol is being standardized for optimizing an indigenous method for making VCO.

A scientific paper on integrated technology for the production of coconut biofuel by cost effective way has published in November 2018 issue of Indian Coconut Journal.

Two more papers are under preparation and they will be submitted on December 2018 in international journals.

### **Academics**

The project work of the IV semester M.Sc students are progressing effectively. Papain gene of Papaya, Lactoferrin gene of Goat milk, Inducible Nitric oxide synthase gene as inflammatory marker gene of ansamycin synthase are the areas of the project work. The second semester M.Sc students are waiting for their University examination. Their theory and practicals are over as per the course plan. The first semester M.Sc classes are moving well as per the schedule.

### **B.Sc Programme:**

## SIBB-R&D

### **Research Activities**

A rapid and cost effective protocol for producing virgin coconut oil (VCO) has been optimized with good percentage of yield. As one of the major objectives of SIBBR&D research, the VCO is being used mainly for determining its role in the biosynthesis of ketone bodies, the substitute of glucose for curing dementia. Along with this, the therapeutic properties of VCO with reference to antibacterial and antidiabetic will also be examined.

The accepted paper of coconut Neera has been published in February issue of International journal of Beverage. As the last phase of the wound healing research funded by DST, we succeed in fractionating the active components of wound healing from the herb Hemigraphis alternata by HPLC. We have done

## SIBB-R&D

### **Research Activities**

The entire activities related to research in March 2019 were focused to three aspects. I). preparation of the manuscript for the international publication. The paper was almost at the completion phase. ii). Submission of the research project to DBT under BIRAC scheme.. the research proposal was submitted. ii). Optimization of the production of Virgin coconut oil (VCO) by repeated trials and its antimicrobial evaluation. The production of VCO was optimized. The antimicrobial property of VCO is being standardized in gram negative and gram positive bacteria.

The other areas of research of the institute include wound healing characterization of iNOS gene in HeLa cells, Molecular characterization of papain gene, amplification and sequencing of goat lactoferrin, detection of actinobacteria as the source of the antibiotic ansamycin from mangroves. The role of anti-inflammatory iNOS gene in wound healing effect was confirmed; the full coding papain gene was amplified, sequenced and analyzed. The expression level of the gene was quantified; more standardization is required for the full amplification of Lactoferrin gene in goat

About SCMS School of Technology and Management

SCMS School of Technology and Management which is affiliated to M.G.University was established in 2003. Over the years SSTM provided quality education in Management, Computer Applications, Bio-Technology, Commerce and Economics. It is certified with NAAC 'A' grade and is also ISO 9001-2005 certified for quality teaching. The MBA programme is also accredited by NBA in 2019.

The MBA programme was started in the year 2003. The department aims at imparting quality education through innovative teaching learning processes. The qualified faculty trains the students to be management professionals. Students are provided with Personality Development Programmes, and training is imparted for developing good communication skills, team building and leadership which would help them excel in the their career and life ahead. We also offer three year BBA programme which was started in 2020.

SSTM offers a two year full time Integrated Master's Programme in computer applications (IMCA) which focuses on programming, logic and software skills and importing hands on knowledge in computer software. We also offer three years B.C.A. Programme.

The M.Sc programme in Molecular Biology and Genetic Engineering was started in 2007. The Departement has laboratories which are equipped with modern equipments for doing active research in BioTechnology. The Bio Technology Lab is recognized by DSIR Government of India as a Research Centre and it is also a Research Centre approved by KUHAS Trichur.

The first U G Programme B.Com was started during the year 2012. There are two stream namely B.Com (Computer Application) and B.Com (Finance & taxation). Add on courses, Personality Development programme and active involvement of students in NSS activities of M.G.University, vocational training and sports are provided to all the UG students.

During the year 2015 B.Sc (Botany and Bio technology) dual degree was started at SSTM. This is the only course that is offered to the students under M.G.University. This course provides concepts in Plant science and Bio Technology .

In 2016 the BA Economics programme was started with specialization in Foreign Trade. The first batch passed out during the year 2019 with two students securing the First and Second Rank in the University. Apart from the BA degree students are offered Add on Courses.

The placement cell functioning at SSTM ensures that students imbibe the right attitude to make them invaluable in a job environment . The faculty members and external experts meet students collectively and individually for preparation for job interviews. SSTM offers excellent, will furnished hostel facilities to its students. Hostels have dedicated mess that offers quality food. Both A/C and Non A/C rooms are available.

Next year approval has been granted by the M.G.University and the Government to start B.Sc Psychology course Model II

## **LAMP based point of care rapid and low cost diagnostic test for COVID 19- a BIRAC funded project at SIBB R&D**

A research project on 'LAMP based, Point of Care rapid and low cost diagnostic test for COVID 19" has been funded by Biotechnology Industry Research assistance Council (BIRAC) of Government of India. BIRAC has granted a fund of 37 lakhs for the project for a duration of six months from November 2020.

RT PCR is the widely accepted and used COVID 19 diagnostic tool as we are aware. But there are only less than 3000 RT PCR test centres in India for all of the 1.38 billion people. An easily accessible portable and economic diagnostic system that can be used at the point of care that does not need high molecular biology skills and infra-structure is what we are trying to develop through this project. Starting material will be the throat or nasal swab, but the results can be made available in less than an hour with an expected sensitivity at par with the RT PCR. The estimated cost per test is less than 500 INR. In nutshell, the viral RNA in the test sample will be amplified in a relatively simple equipment and the test positivity will be displayed as a color band. The standardization work of the project is progressing and the COVID test samples will be analysed in collaboration with Malabar Cancer Centre(MCC), an autonomous medical institute under Government of Kerala. Dr Sethulekshmy Nair, Deputy Director, SIBB R&D is the PI of the project and Dr Harish M from SIBB R&D and Dr Saravanan M from MCC are the co PIs.

# **SCMS SCHOOL OF TECHNOLOGY & MANAGEMENT**

**SCMS Campus, Prathap Nagar, Muttom, Aluva, Cochin – 683 106**

## **Placement Report for the year 2019 – 2020**

Initially the placement season at SCMS School of Technology & Management kicked off quiet strongly and the college as usual was abuzz with placement activities but by end December 2019 and early January 2020 suddenly few companies those were lined up and the slots assigned started cancelling or putting off their hiring activities.

Only later we realized the companies were quick to realize and put off the travelling plans of their visiting executives to the campus.

In the meantime we had to wait for fresh slots which finally ended up in Lockdown in March, however by mid-April, 2020 few companies started their virtual selection process wherein few students got placed during the height of Covid and finally ended up with 50 companies from FMCG, Banking, Insurance, Consultancy, Manufacturing, Hospitality, Retail, E-commerce, Logistics and Pharma made offers to the students, covering about 70.2% of the eligible batch.

The average CTC based on packages offered so far is Rs. 5.68 lakhs p.a. with the highest offer being Rs.12.00 lakhs p.a. Some of the leading companies out of the 50 that have recruited already are Deloitte, Federal Bank, Aditya Birla Fashion & Retail Ltd., Safari Industries, Malayala Manorama TV, TCS, Coffee Day Beverages, HDFC Asset Management, Landmark Group, Hindustan Unilever Ltd., Vodafone Idea, Saint Gobain India Pvt. Ltd., CCS Technologies to name a few.

- A total of 130 FDPs were attended by our faculty during the academic year 2021-22.
- We have a full-fledged placement cell functioning at our college. Many reputed corporates and banks have placed our students. During the academic year 2021-22, 166 students from a total of 295 students who passed out were placed in reputed firms. 30 students opted for higher education during this time span. For PG students the minimum salary that is offered is Rs. 3.6 lakhs to Rs. 4 lakhs. For the UG courses the salary that is offered is between 2.5 lakh to 3 lakhs per annum. For all the courses we have tie-up with various companies for internships. Internship provide valuable experience for the students and we encourage students to join good companies. Our placement for PG courses is 80% and for UG courses it is 60%. For UG courses, the students join for higher studied in India and abroad and that is the reason the percentage is 60%. Some of the students join their own family business and some start their own ventures which we support.
- During the academic year , the number of students who appeared the final year exams is 295 of which 153 passed. The pass percentage for the academic year 2021-22 is 51.86
